

Mary Ann Liebert, Inc.  publishers

FAST FACTS

www.liebertpub.com/cell

Editor-in-Chief

Professor Sir Ian Wilmut, OBE, FRS, FRSE

Deputy Editor

Jane Taylor, PhD

Impact Factor

2.692

* 2009 Journal Citation Reports®
published by Thomson Reuters, 2010

Frequency

Bimonthly

Legacy Content

12 Volumes • 47 Issues • 500 Articles
4,500 Pages—and growing!

Manuscript Submission

- Rejection rate: 70%
- Average time to first decision: 25 days

ISSN

2152-4971

Online ISSN

2152-4998

Key Benefits

- Transforming biomedical research through advancements in reprogramming cellular mechanisms
- Access to the latest, high quality research and discoveries in the field
- Unique multidisciplinary coverage of all aspects of reprogramming including epigenetics, iPS technology, nuclear transfer, and stem cells in one essential resource

The Experts Say

"*Cellular Reprogramming* is the journal that best covers the intersection between cell reprogramming and stem cells of all kinds. Every issue promises pleasant surprises for those involved in this area of research."

--Jose Bernardo Cibelli, DVM, PhD
Michigan State University

Global Visibility and Reach

Over 140 countries

Indexed in

MEDLINE; EMBASE/Excerpta Medica; Science Citation Index Expanded; BIOSIS Previews; Biotechnology Citation Index®; Biological Abstracts; Chemical Abstracts; EMBiology; Scopus; CAB Abstracts
