

The Center for Spinal Cord Injury Recovery (CSCIR) is a unique, state-of-the-art clinical facility,

offering an intensive physical therapy program focused on maximizing recovery. Our experienced staff treats clients from around the world, using a full array of specialized equipment and techniques, in a program tailored to each person's needs.

The CSCIR is one of the first hospital-based programs of its kind in the U.S. to provide long-term, high-intensity, activity-based therapy, to optimize health and function in persons with spinal cord injury.

The program incorporates the latest scientific research and innovative therapeutic techniques, in our quest to make recovery from spinal cord injury a reality.

The Next Step In SCI Recovery

Program highlights:

- 26,000 sq. ft. state-of-the-art fitness center, with enclosed track
